Summary

A DROP|EDU

Vision & Mission
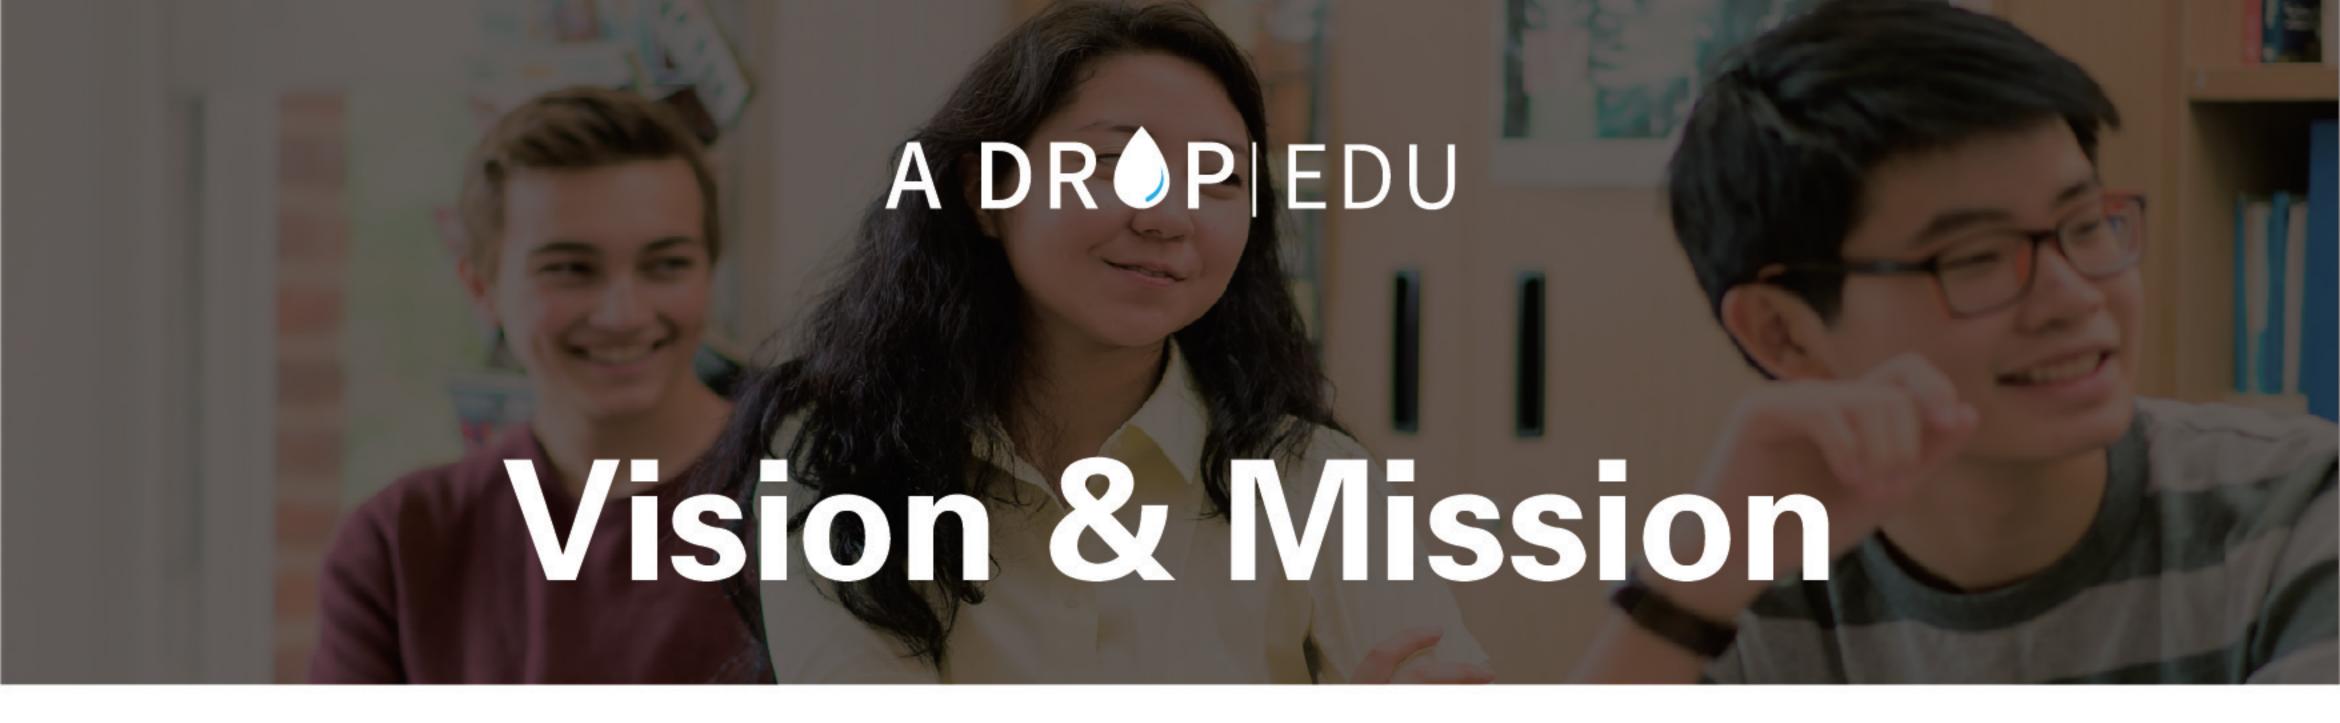

Vision

Aiming to inspire young people a desire to learn, flourish and to serve.

Missions

- ▶ To enable the younger generation an ability to develop an independent and searching mind.
- ▶ To cultivate an inner drive and passion for learning and discover each individual's potential towards a purpose.
- ▶ To help guide the individual to finding inner peace and a deeper meaning of life.
- ▶ To chase the curiosity of the unknown and the individual dream.
- ▶ To nurture confidence and a willingness to embrace a challenge and strive for the resilience of a global dynamic environment.
- ▶ To equip the younger generation to make a positive and lasting contribution to their communities, both now and in the future.

TOP
Private School
Counselling

The course content includes a one to one understanding of the individual students current situation and future education goals. This is aimed at students with the end goal of attending Oxbridge and British G5 (non - Oxbridge) universities. It is also aimed at students with a willingness to apply for Ivy League schools in the United states. The course provides initial background improvement as well as an aid in the application process and step by step guidance to achieving these academic goals.

With a range of top private schools from K12 primary to secondary and high schools in the United Kingdom and the United states, the course will be able to provide the best possible academic background enhancement support. This not only takes form in academic tutors and standardised test prep, but each student will also be provided with an experienced professional educator who will tailor a strategy to ensure this student is successfully guided through the pre application process to enhance their academic studies and allow them to strive for greatness.

Tailor–made One–on–One Tutoring & Guardianship

Program content includes one - on - one academic and background improvement courses, aid in personal statement writing, and academic preparation for entrance exams. Counselling services will also be provided to help students fulfil their potential and help overcome anxieties relating to academic pressure , ultimately helping students enhance their overall mindset.

Academic improvement includes: IGSE/GCSE, A-Level courses, IB courses, art tutoring, AP courses, scientific research projects.

Language improvement includes : IELTS 0 basic improvement 6.5 / intensive course 7.5, writing and speaking full marks teaching and research team /
exclusive 9 learning materials.

Guardian services include but not limited to academic tracking, academic supervision, guidance for higher education, student care, Home Stay and other services.

The Club & Summer Camp

Every year, we select the top summer and winter camps in the UK and provide them to teenagers aged 7-18 from all over the world. The purpose of these camps is to enhance individuals academic and vocational interests allowing them to further their prospects of access to the top private schools worldwide.

Intensive courses prepare international students for GCSE, A Level and IB or AP equivalents and improve their English skills. There are also courses specialising in medicine, computer science and IELTS.

Specific subject vocational classes are provided through our relationship with well known ballet companies and musical theatre groups such as the Royal Ballet Glanders, The National Ballet Company of Spain, and the West End leading workshops such as "Hamilton".

A DROP|EDU

There is also an option for high quality outdoor sports classes, survival skill courses, horse riding camps and stage schools. In addition to rugby, netball , hockey, and cricket , England provides top quality training in these aspects, cultivating the students physical fitness, mental resilience and team-work.

English and art classes are offered, combining intensive language instruction with workshops in filmmaking and graphic design.

Personal background enhancement videos and related productions can be tailored to meet each individual's needs.

Online 3D Coding Course

CreatiCode.com is an online programming teaching platform established in New York, USA in 2017 for children to learn to build 2D and 3D games and animations. It is a seamless extension of the world's most popular MIT Scratch project, featuring easy-to-learn visual modular programming and a global community of learners.

A unique feature of the TRONY programming platform is the simplified tools for building 3D projects. Essentially allowing you to build with simple building blocks. Traditionally, 3D education in schools has been largely limited to 3D modelling (such as TinkerCAD) and 3D printing. Courses in 3D programming can only be taught using specialised tools like Unity, which require students to tackle 3 challenges simultaneously: 3D-related concepts (3D positions, avatars, animations, etc.), complex authoring tools, and high-level programming languages such as C#).

TRONY Programming solves this problem by reusing the Scratch-based syntax and user interface students are already familiar with, so they can focus on learning 3D concepts and unleash their imagination and creativity. This scaffolding method greatly reduces the learning curve, allowing more students to enjoy playing with 3D projects and have a basic understanding of 3D programming, and also lay a solid foundation for them to learn more advanced 3D programming tools in the future.
